December 14, 2012

The Manitowoc County Recycling Center is now accepting aseptic and gable topped cartons for recycling. These cartons include containers for wine, milk, juice, cream, soy milk, soup, and egg substitutes as well as others. These cartons are made from paper, plastic and aluminum and are highly recyclable. If you are dropping off cartons at the Recycling Center they should be placed in with the plastic bottles. We anticipate that incoming plastic loads from local haulers and municipalities will have a mixture of plastic bottles and these cartons.

Guidelines for Carton Recycling are similar to the current guidelines for recycling plastic bottles. Cartons should be emptied and flattened. There is no need to rinse them though.
